We must all stand together to beat the third wave of the coronavirus. We can do this by understanding how coronavirus spreads and keeping up our good habits.

- Coronavirus spreads through the air when people breathe, talk, cough, sing or shout.
- It spreads quickly during waves that last several months.

We can protect ourselves by:
- Keeping gatherings small, short and outdoors.
- Making sure we have as much fresh air as possible indoors.
- Wearing our masks when with others or leaving the house.

Stay home for 10 days and test if you develop coronavirus symptoms:
- Cough
- Sore throat
- Fever

Try to stay separate from others in your home. If you can’t, wear a mask and open doors and windows.

Go to hospital immediately if you develop:
- Difficulty breathing
- Chest pain or pressure that won’t go away
- Confusion
- Can’t wake up completely

Spend time with others safely

If you are sick, stay at home.

Keep physical distance from others.

Wear a mask.

Cover your cough.

Don’t spit, shout or sing close to other people.

Wash or sanitize your hands often.

Do not shake hands, hug or kiss anyone outside those in your home.

Postpone or cancel parties.

Limit the size of your gatherings and keep them short.

Meet outside where possible.

If you must be inside, open windows and doors to create good airflow.

Be extra careful if you are at risk of severe COVID-19: over 55 years or with diabetes, HIV, TB, kidney disease, hypertension, chronic lung disease or cancer.

Stay safe
