

Be coronavirus safe at school

Keep shared work areas clean

- Remove unnecessary items from shared work areas.
- Avoid sharing work surfaces, desks, pens, other stationery and equipment with others, if possible.

Clean and disinfect at least once a day. For shared equipment, also disinfect after each use.

- First clean with detergent (soap) and water, and wipe with a rinsed cloth.
- Then wipe with disinfectant such as diluted bleach solution and allow to air dry. For smaller surfaces, 70% alcohol or disinfectant wipes can be used.
